

I drive over an hour each way to work each day. XM radio keeps me entertained and informed the whole way. I can listen to 24hour news channel, comedy or soundtracks all the way. The weather and traffic channel really aides me in making the right choice in which road to take to work. The local radio stations do an okay job of reporting the news, weather and traffic, but XM does a much better job. Please allow them to keep performing such a fine service!
